Back and Neck Pain

LOW BACK AND NECK PAIN

One of the most common reasons why people seek physical therapy in the United States is to find relief from debilitating back and neck pain.

Both acute and chronic pain can seriously impact our quality of life and in the extreme, make it impossible for us to work or live as we did prior to its onset.

We work with each patient individually to find the root cause of the pain and then customize a treatment plan to bring relief and begin the healing process.

Our hands-on therapy and use of modalities are normally combined with prescribed exercises so that you can be a partner in your recovery by working on it between clinic visits.
